PLAY IT SAFE...

PROTECT YOUR HOME AND FAMILY WITH HOMESAFE'S HOME PROTECTION PLAN.

Using advanced technologies, HomeSafe will give your house a thorough, expert "check-up" annually. We can find small problems before they become costly – and big problems before they become dangerous.

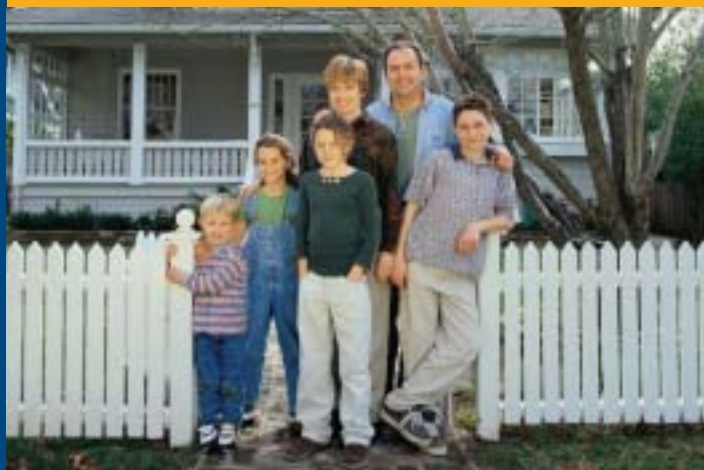

Only HomeSafe offers year-round home protection services to keep your home safe and trouble-free.

THE HOME PROTECTION PLAN HELPS YOU:

- >> Protect your family from health and safety hazards.
- >> Protect the market value of your home.
- >> Make repairs BEFORE they become costly.
- >> Prevent termite, mice and other pest infestations.
- >> Keep a running record of your home's condition and improvements.

HOMESAFE'S HOME PROTECTION PLAN INCLUDES:

- >> 11-Point Comprehensive Home Protection and Safety Inspection
- >> Infrared Scan of All Major Systems (electrical, plumbing, roof, windows, etc.)
- >> Acoustic Detection of Termites and Other Wood-Destroying Insects
- >> Child Safety Inspection
- >> Senior Safety Inspection
- >> Fire Safety Inspection
- >> Energy Loss Inspection
- >> Moisture Detection
- >> Up to 3 Follow-Up Inspections Annually
- >> 48-Hour Emergency Inspection Response Guaranteed
- >> Discounts on Other HomeSafe Products and Services
- >> Enjoy HomeSafe Preferred Client privileges just for signing up!

THE POWER OF TECHNOLOGY

HOMESAFE IS THE ONLY COMPANY USING STATE-OF-THE-ART INFRARED AND ACOUSTIC TECHNOLOGIES FOR HOME PROTECTION AND SAFETY INSPECTIONS.

1. INFRARED SCANNING

HomeSafe's infrared camera "sees" into your walls, ceilings and floors. We can detect "invisible" problems that other inspectors can't see, including: structural concerns; electrical flaws; water damage and leaks; energy loss; missing insulation and more!

2. VISUAL INSPECTION

For added accuracy, HomeSafe follows its infrared scan with a complete visual inspection of all major systems, including structural, electrical, roofing, plumbing, heating/cooling, ventilation, insulation and interior/exterior.

3. ACOUSTIC TERMITE DETECTION

HomeSafe uses acoustic (listening) sensors and software (patents pending) to "hear" termites and other wood-destroying insects inside your walls. We can pinpoint their exact location for better treatment!

IT'S THE MOST ADVANCED HOME INSPECTION IN THE WORLD!
